MDNR 20130117 WLL SWMP slide.pptx
West Lake Jan2013 Public Meeting for MDNR.pptx

Per our discussion on the phone this morning, here is the EPA powerpoint from our January 17, 2013 public meeting, as well as the slide MDNR prepared and provided to EPA on the landfill fire. The title of the file with the EPA powerpoint ends with "for MDNR", which simply means that I prepared a version of the EPA powerpoint without notes to give to MDNR when they requested a copy before the public meeting.

EPA does not have the other information on the odor mitigation construction work that Joletta requests below.

Sincerely,
Daniel R. Gravatt, PG

Joletta just called and as she states below, she would like a map. Do you have one that can be emailed to her?

Subject: Republic Services Landfill/ West Lake landfill

I would like to ask you if you could email me a map of where exactly the odor mitigation construction work such as wells, mainforce lines, membrane locations and others controls are being implemented and developed on the landfill area. During the last EPA's public meeting there was an exhibit showing where the fires/odor problems are located or originating from and location of the Unit with radioactive impact; could you email me a copy of this map?

Could you email me a copy of your presentation as per this public meeting?

Based on the Order issued by MDNR as of February 1, 2013 the Landfill needs to

develop plans to remedy violations and nuisances; we need information about locations and types of the remedies.
I appreciate your assistance. Thank you so much.
